The Army of God will be released by Kunati Publishing in the spring of 2008.

It's 2022, a decade after a devastating computer virus was unleashed upon America and the world. Civilization has crumbled in an economic collapse that rivals the Great Depression of the previous century. During this harsh decade, the schism between those who think technology will save the world and those who believe it to be the tool of Lucifer has reached a boiling point. The Church of Natural Humans, led by the charismatic ADAM JORDAN, is determined to roll civilization back to a pre-computer era. His beautiful African-American lover, MOESHA JEFFERSON, leads the Army of God, a cult of fanatics within the Church, in a series of murders of anyone they consider a technologist.

DAVID BROWN, the gifted but troubled son of one of the most hated of criminals, receives a delayed email from his long dead father, the software genius RAY BROWN. The world believes that David's father unleashed the computer virus that caused the death of more than 100,000 people and led to the global depression, but the email suggests that his father was on the trail of the real criminals. David has grown up in a hostile atmosphere due to his father's crimes, so he resolves to discover who his father was, and if he really was to blame for the virus. His only memories are of a man made erratic by too much alcohol and driven by his passion for technology.

DIANNE MORGAN is a ruthless woman. She leads the Domain, a secret society of technologists developing Sentinel, an artificial intelligence with the ability to seize control of the Internet and all other computers. Needing money and muscle to achieve her obsession for power, Dianne enters into a partnership with organized crime, led by MARIA VITULLO. Vitullo, it is rumored, seized power within the Families by murdering her uncle, the former Don. Vitullo controls the technology black market for the Domain, as well as providing soldiers in the war against the Army of God.

As David tracks through his father's startling history, he stumbles into this hidden war. Fearing that he will expose the Domain, Dianne orders Vitullo to kill him. However, Moesha has her own plan: to keep David alive so she can follow his trail to the Domain and then eliminate all the technologists. Hunted by killers from both organizations, David unravels his father's secrets, comes to terms with his own life, and then falls in love with a woman from his father's past.
